## Version Control

Version #	Date	Author	Description
1.0	03/06/2014	MR	Initial Draft

## Test Scripts:

The following scripts, links and pages consist of deleting and validating Publications from Test Authoring UI

## Test Components:

This test scenario covers the following high-level test requirements (see scripts below for specific requirements covered by each test script):

- 1.0 Manage Publications

## Requirements Traceability:

*RADTIB 21, RADTIB 38.4*

## Testing Requirements:

- Specific standards publications from Core Standards will be associated with a tenants and a subject specific to that tenant.
- Standards publications from Core Standards are browsed and associated with a publisher and a subject.
  - Show a grid of publications with the publication name, description and subject
  - Provide a dropdown with every publisher that has a publication in the repository. Allow the user to select a publisher to filter the publications in the grid by publisher. Default is “Show all publishers”
  - Show a dropdown of subjects from the subject metadata to select from
  - Show a dropdown of publishers from the publisher metadata to select from
  - Confirm association of a standards publication to a publisher and a subject.
  - Allow disassociation of a publication from a subject/publisher

Script #:1.1 Delete & Validate Publication

# Smarter Balanced RFP # 11/Test Authoring
