Smarter Balanced RFP # 11/Test Authoring

Test Authoring / User Interface

Scenario Description:

Deactivate Subjects from UI

Version Control

Version #	Date	Author	Description
1.0	03/06/2014	MR	Initial Draft

Test Scripts:

The following scripts, links and pages consist of deactivating and validating Subjects from Test Authoring UI

Test Components:

This test scenario covers the following high-level test requirements (see scripts below for specific requirements covered by each test script):

• 1.0 Manage Subjects

Requirements Traceability:

RADTIB 20, RADTIB 20.1, RADTIB 20.2

Testing Requirements:

- The Test Authoring application will maintain Subject metadata for each tenant via a user interface that is not multi-tenant.
- Subject metadata shall include a full subject name as well as a three-character short code.
- Both the full subject name and three-character subject code shall be emitted in the test package XML.

Script #:1.1 Deactivate Subjects

Purpose:

Manage subject metadata

Assumptions:

 Test Spec Bank, ProgMan, Permission, Test Item Bank, Core Standard systems are up and running

Smarter Balanced RFP # 11/Test Authoring

Test Authoring User Interface

Prerequisites:

- Test Author application is online and user has valid credentials to login
- · Active subject is available for deactivating
